Subject: R/W clearing on V-X-3874

Randy / Ken – Good Morning .

As discussed we would like to self-perform this work .

Based on manpower and equipment needed to clear r/w and 2 dump fees – estimate based on 16 hours .
We plan on losing as much as possible on the r/w (smaller brush , smaller trees , etc.)
Estimated costs \$ \$5,896.64

Anything over 16 hours would go to hourly rate of \$368.54 @ hour.
We feel confident we can get the clearing knocked out in 16 hours .

If approved we would like to put this on our schedule for Jan 2nd , 2024.

Thank you , Chris Sands
